Project Proposal: Website for Sangameshwara Planning and Xerox

Prepared for: Sangameshwara Planning and Xerox
Location: Near Tassel Office, Bidar, Karnataka
Date: October 26, 2023

---

1. Project Overview & Objectives

This proposal outlines the development of a professional website for Sangameshwara Planning and Xerox. The primary goals are to:

- **Establish an Online Presence:** Showcase the shop's 20+ years of experience and diverse services to the Bidar community.
- **Generate Leads:** Attract new clients for civil engineering and construction services.
- **Improve Customer Service:** Provide online appointment booking and clear service information.
- **Integrate Business Operations:** Create a simple system to track cash and online payments.
- **Boost Local Visibility:** Ensure the business appears on Google Maps.

---

2. Recommended Technology & Platform

To manage the payment tracking and appointments effectively, a dynamic website is necessary. I recommend using **WordPress** with specific plugins. It is user-friendly, cost-effective, and powerful.

- **Platform:** WordPress.org
- **Theme:** A professional multipurpose theme (e.g., Astra, OceanWP, or Phlox) that allows for a clean, trustworthy design.
- **Key Plugins:**
    - **Appointments:** Simply Schedule Appointments or Bookly for the engineer's consultation booking.
    - **Payment Tracking:** WPForms (to create a submission form) or a custom solution using a plugin like TablePress to display a simple ledger.
    - **Maps:** MapPress for easy Google Maps integration.
    - **E-commerce (Optional):** WooCommerce if they ever want to sell stationery online, but initially, it can be just for showcasing products.

---

3. Website Structure & Pages

Here is the recommended sitemap, organized for the best user experience.

- **Home Page:** A welcoming overview highlighting the 20+ years of trust, the two main divisions (Civil Engineering & Xerox/Stationery), and the location near Tassel Office, Bidar.
- **About Us:** The story of the business, its journey over two decades, and the team of 4 members. A photo of the team at the shop would be excellent here.
- **Our Services (Main Menu Dropdown):**
    - **Civil Engineering Consultation:** Dedicated page for the engineer.
    - **Xerox & Digital Services:** Dedicated page for the Xerox center.
    - **Stationery Items:** A gallery or list of available stationery.
- **Civil Engineering (Detailed Page):** *This is a crucial page.*
    - **Heading:** Meet Our Chief Civil Engineer (25+ Years Experience)
    - **Content:**

        - Profile of the engineer, highlighting his experience.
        - **Services Offered:**
            - **Estimation & Costing:** Detailed breakdown of project costs.
            - **Map Design:** Traditional hand-drawn maps & modern AutoCAD drawings.
            - **End-to-End Construction:** Building houses from foundation to completion.
        - **Call to Action:** A prominent button saying "Book a Consultation" or "Get a Free Estimate."
        - **Appointment Section:** An embedded booking form for consultations.
- **Xerox & Stationery (Detailed Page):**
    - **Heading:** Fast, Reliable Xerox & Stationery Services
    - **Content:**
        - **Xerox & Printing:** High-quality black & white and color printing.
        - **Government Typing Services:** Highlighting the **4 dedicated computer systems** for

typing. List specific services like Court Case Documentation, Online Application Filling (Scholarships, Passport, etc.), and Form Printing.

        - **Stationery:** List the types of stationery items available (notebooks, pens, office supplies).

- **Payment & Records (Client Portal Style Page):**
    - This page would be for their internal use or for customers to view their transaction history.
    - A simple form for staff to enter: **Date | Customer Name | Service | Amount | Payment Method (Cash/Online)**
    - This data would populate a simple, searchable table below the form, acting as a digital ledger.
- **Contact Us:**
    - **Interactive Google Map** pinpointing the exact location (Near Tassel Office, Bidar).
    - Full Address, Phone Number, and Email.
    - A simple contact form for general inquiries.
    - Business Hours.

---

4. Feature Breakdown (As Requested)

Let's map your specific requests to the features on the site:

Your Requirement	How it will be implemented on the Website

5. Content for the Website (To be provided by you)

To make the website authentic, please gather the following:

- **Photos:**
  - The shop front from the outside.
  - The team (4 members) at work.
  - The Xerox/typing area showing the computers.
  - The stationery section.
  - Photos of completed construction projects (exterior, interior).
  - Examples of maps (hand-drawn and AutoCAD).
- **Text:**
  - A short history of the business.

- A short bio for the Civil Engineer.
- A list of common Government typing services you offer.
- A list of popular stationery items you stock.
- Your exact contact details and business hours.

---

6. Next Steps

1. **Domain & Hosting:** We will register a domain name (e.g., sangameshwaraplanning.com) and purchase web hosting.
2. **Design & Development:** Set up WordPress, install the theme, and build the pages according to the structure above.
3. **Content Population:** Upload your photos and text.
4. **Google My Business:** Set up and verify the Google My Business profile, link it to the website.
5. **Testing:** Ensure the appointment form, payment record page, and contact form work perfectly.
6. **Launch:** Make the website live!

Add engineer name as Anil kumar Kulkarni
